Amar Konangeri

DevOps Engineer

+91 7093207374 | GitHub | LinkedIn | Portfolio | konangeriamar@gmail.com

Professional Summary

DevOps Engineer with 2+ years of experience in a startup environment, owning infrastructure and deployments across cloud and on-premises environments. Skilled in Kubernetes, Docker, CI/CD, automation, and observability, with a hands-on, ownership-driven approach to solving complex operational challenges and improving platform reliability and scalability.

Technical Skills

Languages & Tools: Python, SQL, JavaScript, Shell Scripting, Kubernetes, Docker, Podman, Helm, Terraform, Argo CD, GitHub, Linux, Networking, Event-driven Microservices, Dapr (Distributed Application Runtime),FastAPI, REST APIs, Pydentic Auth, Distributed-Systems, Scalability.
Cloud, DevOps & CI/CD: Microsoft Azure, Google Cloud Platform(GCP), Amazon Web Services(AWS), Git, GitHub Actions, Jenkins, Kong API Gateway(OSS), Nginx, Load Balancing, Redis Pub/Sub.
Networking & Protocols: ADB, TCP/IP, WebRTC, HTTP/HTTPS, DNS, DHCP, ARP, Experience in “SOHO”.
Databases & Messaging: PostgreSQL, Redis, Elasticsearch, MangoDB.

Experience:

FlintLab Inc., Visakhapatnam
DevOps Engineer | Founding Engineer July 2024 – present

- Engineered and operated hybrid cloud–on-premises infrastructure integrating cloud-hosted microservices with on-premises device services to support distributed device management and testing workloads.
- Managed GCP/Azure cloud infrastructure supporting large-scale production applications and business-critical services.
- Designed and maintained CI/CD pipelines automating build, testing, and deployment workflows.
- Implemented centralized observability dashboards across cloud and on-premises infrastructure using Prometheus, Grafana, Fluent Bit, Elasticsearch, Node Exporter, and cAdvisor, improving visibility into infrastructure health, application logs, and service behavior.
- Designed a governed artifact repository strategy covering npm packages, Python dependencies, container images, and Helm charts, defining development and production repository boundaries to support controlled dependency promotion, reproducible deployments, and secure software distribution.
- Investigated hybrid-network connectivity constraints between cloud workloads and on-premises systems using VPN diagnostics, ICMP packet-size testing, and Path MTU Discovery.
- Configured and troubleshot application routing and HTTPS access using Nginx, Kong Ingress Controller, Kubernetes Services, cert-manager, and TLS certificates.
- Investigated recurring operational issues and implemented automation-based solutions.
- Authored and contributed to engineering enablement through documentation, onboarding support, and knowledge-sharing sessions.

Cognizant Technology Solutions India Private Ltd.,
Process Executive - Data November 2018 – April 2019

- Reviewed, validated, and updated geographical map data, including road networks, location details, and Points of Interest (POIs)
- Performed quality checks (QA/QC) to identify discrepancies, correct data errors, and maintain mapping standards.

- Performed data annotation and labeling tasks to categorize map features and support data quality requirements.

Education:

- Post Graduate Diploma in Management – Institute of Public Enterprise (OU) 2021– 2023

Certificates:

- Microsoft Certified: Azure Fundamentals.
- Udemy: The Ultimate MySQL Bootcamp.
